Main Features

Mobile Responsiveness

Mobile-friendly design to ensure access and functionality on a variety of devices.

Resource Hub

A section with educational materials, resources, and information about the assessed disorders, including links to reputable sources, support groups, and services.

User-Friendly Questionnaire

A user-friendly questionnaire that gathers relevant information about the child, including their behavior, development, and other key indicators.

Machine Learning Algorithm

A machine learning model that processes the user's responses and evaluates the likelihood of specific disorders based on established criteria and research.

Real-time Assessment

The ability to provide real-time feedback to parents, caregivers, or users about the risk or likelihood of disorders such as ADHD, Dyslexia, Autism, etc.

Feedback and Improvement

Mechanisms for users to provide feedback, which can be used to improve the accuracy and effectiveness of the assessment tool.

See Our Mission in Action

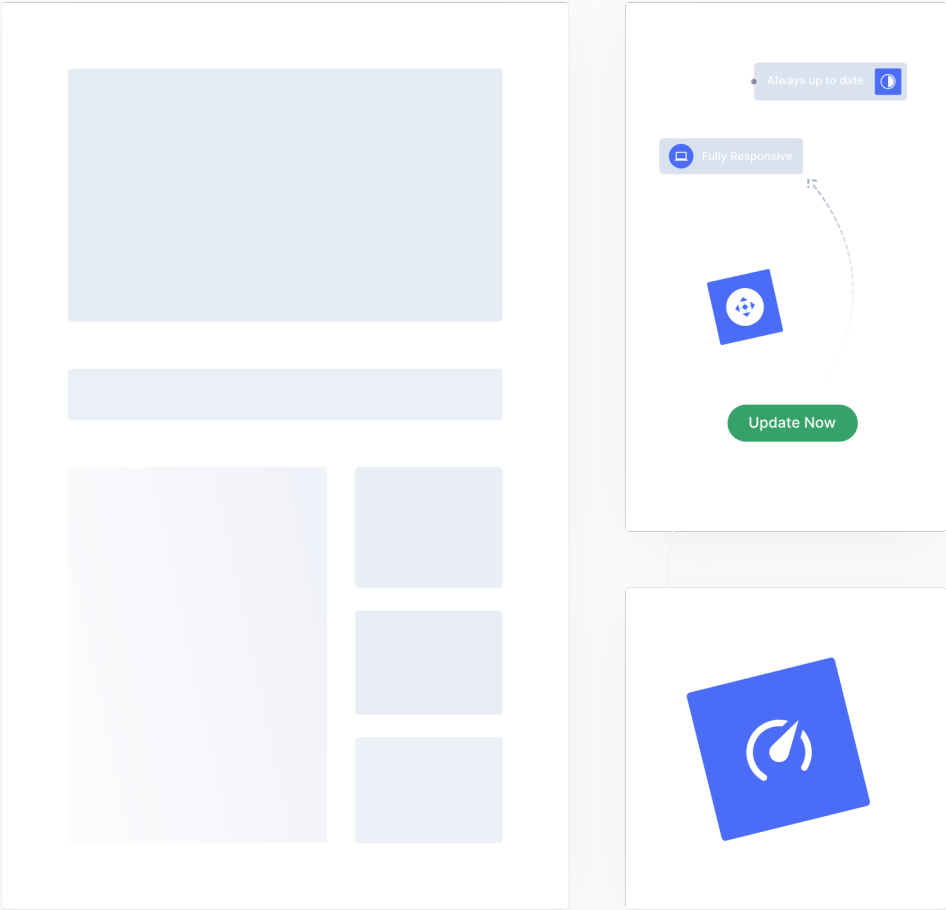

Watch our video to witness our dedication in aiding children's health through early disorder detection.

We're passionate about making a positive impact on the lives of children and their families.

Our mission is simple yet profound: to empower parents and caregivers with the knowledge and tools they need to make informed decisions about their child's health and development.

- ✓ Data-Driven Insights
